

Wristbandits  
Notes to the future.

When there is an influx of students it is best to do the experiment on them at the same time and explain it later to stop the line getting larger. it is a good idea to bring hand-sanitizer because you're touching lots of children's hands. The place to get the rubber bands is Office Depot , Office Max, Staples..etc. You need about half a pound of rubber bands and sharpies. Practice on your friends for it to become hard for them to notice when you are pushing on them. Always over exaggerate your pushing to make the kids feel like they are strong. if possible set up outside and make sure you have lots of space to perform the experiments.
